About me: Passionate civil/structural engineer with 2 years of experience in civil engineering field (structure related) and studied masters in civil engineering (structural engineering) at Kasetsart University. Designed and analyzed the structures of hydropower with excel calculations and by using software like SAP, STAAD. pro etc. Proficient in performing the finite element modeling of any structures and have in-depth knowledge of concrete/steel/composite structures. Seeking a role where I can pursue my passion to explore the structural engineering field.
